As we understand that the eProject is a step-by- step learning environment that closely simulates the class-room and Lab based learning environment into actual implementation. It is a projectimplementation at your fingertips!! An electronic, live juncture on the machine that allows you to.

- ✓ Practice step by step i.e. ladder approach.
- ✓ Build a larger more robust application.
- ✓ Usage of certain utilities in applications designed by user.
- ✓ Single program to unified code leading to a complete application.
- ✓ Learn implementation of concepts in a phased manner.
- ✓ Enhance skills and add value.
- ✓ Work on real life projects.
- ✓ Give a real life scenario and help to create applications more complicated and useful.
- ✓ Mentoring through email support.

We would like to send a great thank to our professor and others student for the addorable supports during the time in project.

Beside serveral mistakes we had made in the project, we hope to have more oppotunities to widen our knownledge in web developing world.

We also thank you so much for your infomation and the “demo” project from India APTECH to help us get more reality experience in this project. Since we have gained more experience from this project, we will not stop learning any thing as much as we can to be more successful in the future.

Your Sincerely,

Team Group 01.

# Synopsis

The Objective of this program we aim is to give a sample project to work on real life projects. These applications help us build a larger more robust application.

The objective is not to teach us HTML/JavaScript but to provide us with a real life scenario and help us create basic applications using the tools.

Hence, we can revise the chapters before we start with the project.

This project is meant for students like us who have completed the module of HTML5. These programs should be done in the Lab sessions with assistance of the faculty if required.

The website (in this project) is a tool that brings everything in the world to you such as historic monuments information natural knowledge or skill in technology... Apply the latest versions of technologies to the project, making the product more vivid and attractive

It is very essential for us that will have a clear understanding of the subject. We think we should go through the project and solve the assignments as per requirements given.

And get back ***eprojects@aptech.ac.in*** as the assigned schedule.

<b>Design Plan:</b> Bakerz Bite	<b>Document Name:</b> Problem Definition	<b>SWD/Form</b> No.01/PD/Ver1.0

## Problem Definition

Since its launch, “**Bakerz Bite**” has developed into a reputable bakery & café, specializing in baked goods, passionately made from the finest ingredients.

Bakerz Bite offers a wide range of baked goods made fresh in-store every day. The bakery chain offers more than 300 different kinds of baked goods, including artisan pastries, gourmet cakes and desserts, and handcrafted beverages.

The brand takes pride in sourcing and using carefully selected ingredients and promises to bring freshness and quality to its customers. Bakerz Bite continues to expand and embrace innovation in all markets.

We believe and are dedicated to delivering premium quality products. So we only use real butter, cream, and unbleached flour. We treat our customers as our family and will not use any ingredient which we will not want to feed ours.

*Our Motto: Where smiles are served daily.*

With the strong development of the software industry and the widespread popularity of the Internet, today customers can buy goods in a very different way. We can sit at home, in front of the computer, or anywhere with internet-connected smart devices to watch new cakes and shop online easily. We don't have to go to the store to buy cakes, we don't have to worry about the cake samples are still out of stock and are delivered to the address by the staff.

Therefore, the demand for ordering and buying online is very large. Grasping that demand, the customer requested to build the project “Bakerz Bite” a Single-Page-

## Customer Requirements Specifications

### User:

#### Input:

- Order to receive data registration.
- Information about cakes and drinks of interest.
- Comments, reviews about products.

#### Process:

- Find information about cakes and drinks.
- Find information about product prices.
- Find store address information.
- Find information about discounted products.
- Search for information on top-trading products.
- Check comments information.
- Check product cart information.

#### Output:

- Notification of successful / failed registration.
- Information about selected products.
- Store information.
- Information about ingredients.
- Notice of success / failure feedback.

## Webmaster:

### Input:

- Admin login information.
- Information about the number of products to add/edit/delete.
- Information about product materials to add/edit/delete.
- Information about discount events is subject to change.
- Member information needs to be deleted.
- Respond to member comments.

### Process:

- Add/edit/delete product content.
- Add/edit/delete sale events.
- Remove member.
- Check feedback information.
- Delete comments.

### Output:

- Notification of order success/failure.
- Notification of adding/editing/deleting the number of successful/failed products.
- Notification of successful/failed adding/editing/deleting product information.

- Notice of successful/failed adding/editing/deleting store addresses.
- Notice of successful/failed adding/editing/deleting members.
- Notification of successful/failed feedback replies.
- Notice of successful / failed comment deletion.

## Hardware / software requirement:

### Software:

Technologies to be used:

- Frontend: HTML5, CSS, Bootstrap, JavaScript, jQuery, AngularJS, XML
- Data Store: JSON files or TXT files

### Hardware:

- Intel Core i3/i5 Processor or higher
- 8 GB RAM or above
- Color SVGA
- 500 GB Hard Disk space
- Mouse
- Keyboard

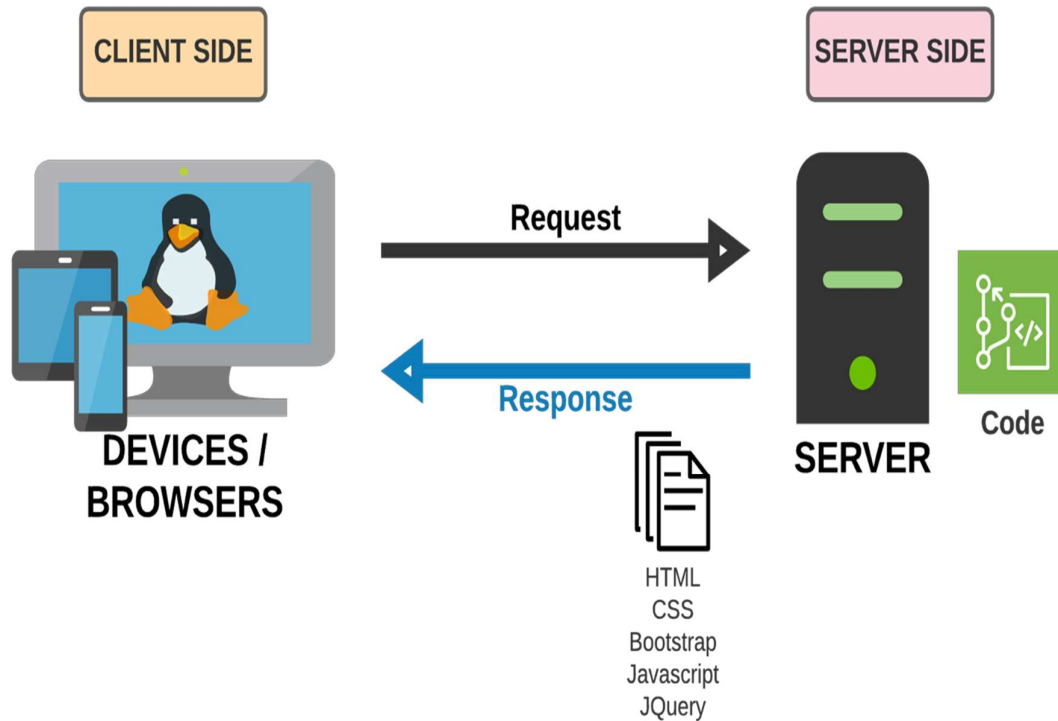

### Other Requirements:

- Operating Portal: Windows
- Browsers: Edge, Chrome, Mozilla Firefox, Safari.
